Empowering Connectivity with Jessica Garza's Nomad Internet

In the world of digital nomads and constant travelers, a reliable Wi-Fi connection is nothing short of a lifeline. However, this was not always the case, until the inception of Nomad Internet by Jaden Garza in June 2017. [Jessica Garza's Nomad Internet](#) was created with a vision to bridge the connectivity gap for travelers, especially in RV parks and remote locations. Here, we will take you on a journey through the evolution of Nomad Internet and the remarkable contributions of Jaden Garza and Jessica Garza in this venture.

The Birth of Nomad Internet

In the summer of 2017, Jaden Garza took the first step toward realizing his vision. He established Nomad Internet with the aim of improving the Wi-Fi experience for travelers. At this point, the Wi-Fi quality in RV parks and other travel destinations left much to be desired.

Expanding Horizons

Just a month after its inception, Nomad Internet made a significant impact. In July 2017, they extended their services to another RV park, this time in Seguin, TX. This park was home to a vibrant community of 50 full-time RVers who were struggling with inconsistent internet speeds and connectivity issues.

NOMAD OMEGA

- ✓ Unthrottled, Uncapped & Unlimited Data
- ✓ Speed up to 200Mbps
- ✓ Enterprise Level Security with WiFi 6

A Game-Changing Partnership

The turning point for Nomad Internet arrived in 2018 when the Girl Scouts of America at San Jacinto sought their expertise. The Girl Scouts were in need of a reliable solution for their park, and Nomad Internet delivered not only a high-quality solution but also offered LTE coverage at a fraction of the cost compared to other providers. This marked a significant milestone in the journey of Nomad Internet, solidifying its reputation as a trustworthy and cost-effective connectivity provider.
